SUMMARY

Data professional with 3 years of QlikView experience, upskilled in SQL, Python, Deep Learning and Machine Learning, seeking to transition into a Data Scientist role to leverage analytical capabilities for impactful insights.

EXPERIENCE

Data Analyst | Price & Margin Management | Holcim | Mumbai **Mar 2022-Present**

- Built and maintained the **Global Pricing Tool**, integrating commercial and financial data across EMEA, APAC, and LATAM regions into a centralized **Pricing Data Lake**, improving data availability by **100%** compared to manual collection.
- Designed interactive dashboards in **Qlikview** and **QlikSense**, consolidating KPIs like **Pure Price Indicator**, **Price over Cost**, and **EBIT per Ton**, enabling real-time country ranking and reducing KPI retrieval time by **40%**.
- Automated KPI reporting processes, cutting manual reporting hours by approximately **30%**, leading to faster and more accurate pricing decisions for over **50+ global Pricing Managers**.
- Developed advanced **visualizations** (scatter plots, waterfall charts, country ranking tables) to track Price and Volume Evolution across different Variance types — Standard, **Growth at Local Currency (LC)**, and **Organic Growth** — accelerating actionable insights by **20%** at MTD/QTD/YTD levels.
- Led training sessions and collaborated with cross-functional teams to ensure smooth user adoption, achieving a **95% user satisfaction score** from Pricing Managers based on internal feedback.

Internship | HCL Foundation | Remote **Dec 2020-Jan 2021**

- Analyzed survey data on beneficiaries' employment, income, and migration during the pandemic.
- Created Excel dashboard on social demographic profile and performed **Univariate analysis** on average family income.

PROJECTS

- **Credit Card Default Prediction:** Performed **EDA**, **hypothesis testing**, and **feature engineering** on credit card usage data to build a default **prediction model**. Compared **Logistic Regression**, **Random Forest**, and **XGBoost** using **cross-validation** and **hyperparameter tuning**. Achieved best results with XGBoost: **ROC AUC** Score 0.78 and **Accuracy** 82%, highlighting key drivers of default risk.
- **Sentiment Analysis:** Built an **NLP pipeline** applying data cleaning, **tokenization**, **BoW**, **TF-IDF**, and **Word2Vec vectorization** techniques. Trained and compared **Feedforward Neural Networks** across different vectorization for sentiment classification. Achieved 86% **accuracy** and 0.93 **AUC** score using Word2Vec embeddings, outperforming other techniques.
- **Mumbai's Temperature Prediction and Forecasting:** Built **deep learning models** (**RNN, LSTM, Bi-LSTM, GRU**) to forecast Mumbai's temperature using historical weather data. Engineered lag features, scaled data, and **optimized hyperparameters** to improve model accuracy. GRU model achieved the best performance with an **RMSE** of 1.46, providing highly accurate temperature forecasts.

SKILLS

Languages & Libraries: Python (NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, TensorFlow), SQL
Machine Learning & Deep Learning: Supervised Learning, Unsupervised Learning, Feature Engineering, Model Validation, Neural Networks, RNN, LSTM, GRU
Natural Language Processing (NLP): Text Preprocessing, Bag of Words (BoW), TF-IDF, Word2Vec
Data Analytics & Visualization Tools: QlikView, QlikSense, Google Spreadsheet, Matplotlib, Seaborn
Statistics & Data Analysis: Descriptive Statistics, Hypothesis Testing, Exploratory Data Analysis (EDA)
Relevant Coursework: SQL (Namaste SQL – Ankit Bansal), Deep Learning and Natural Language Processing (Krish Naik, CampusX)

EDUCATION

M.A./M.S. Analytics | 7.1 CGPA | **2020-22**
Tata Institute of Social Science, Mumbai

Mechanical Engineering | 72.44 % | 2015-19
ABES Engineering College, Ghaziabad

CERTIFICATIONS & ACHIEVEMENTS

Awards: Individual Extra Miler Award Q3, 2023, Star of the Month Dec 2022 - Holcim

Certifications: HackerRank - SQL (Intermediate), Intermediate Python (Data Science), Exploratory Data Analysis in Python, Supervised Learning with scikit-learn, Machine Learning with Tree-Based Models in python, Dimensionality Reduction in Python.
